<h1 style="text-align:center">The Gold Miner Bonus</h1>

The Goldminer was actually going to be a unique forex product for sale on its own but we have now decided to give this bonus away for free. It consists of 2 powerful indicators that work in conjunction with each other, getting you in on the trades at the right time.
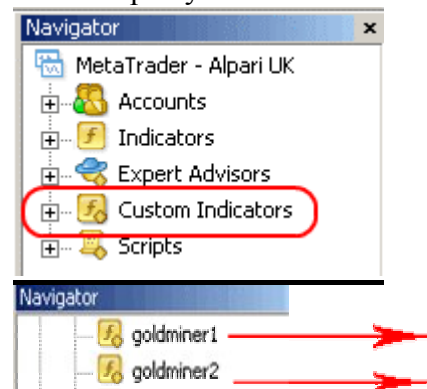

Setting up your Gold Miner.

Ok so you will have set up your forex funnel software by now so should be familiar with where to put the .ex4 files, the only difference with the Gold Miner software is that they are custom indicators so you need to place the 2 goldminer.ex4 files into the indicators folder which can be found here on your computer.

C:/program files/metatrader/experts/indicators

You can find this folder by following the steps below.

1. Got to start (normally bottom left on the computer)
2. Click 'my computer'
3. Double click 'local disk c:'
4. Double click 'Program Files'
5. Double click your metatrader brokers folder
6. Double click 'experts'
7. Double click 'indicators'
8. Now drag and drop the 2 goldminer .ex4 files into this folder.

Once you have placed the 2 Gold Miner files into the correct indicator folder you need to open your metatrader account and navigate to '**custom indicators'.**

Drag both Goldminers onto the 1 hour chart

Once you have found both the Gold Miner indicators under the custom indicators tab, you can now drag them both onto any **1 hour chart** and you will see something like the following layout.

So once you have the Goldminer set up like the above on the 1 hour chart or above you are looking for the signals which are as follows

RED + PURPLE ARROW = SELL

BLUE + YELLOW ARROW = BUY

How you exit will be determined by which timeframe you are using, we suggest using the same tp and sl i.e 30 pips take profit 30 pips stop loss.

Any questions please don't hesitate to ask support@forexfunnel.com.

Thanks
